SYNOPSIS

The woman and the man are in a room, a gecko sits in a terrarium, several flies are circling a lamp. Gradually we find more and more dependencies and analogies between their activities and observed elements as the rhythm of their universes accelerates. The microcosms shown seem to interact rhythmically and belong to some cosmic order.

DIRECTOR'S NOTE

The film places great emphasis on the prominence of cinematic form expression. Through the use of editing rhythms and repetitive, increasing sequences of sound, the observation of the world of the characters gains a place in a dynamic, disturbing vision.
